

Hope for Peru

AN UPDATE ON YOUR GIFT TO PLANT A NEW CHURCH

Prepared for Vale Church

Presented by Matt Kitchen

Winter 2024 Update

Releasing children from poverty
Compassion®
in Jesus' name

Builders have been working hard and have completed 70% of the construction. Pictured left is the most recent photo of the building.

Cover photo: The exterior walls of the sanctuary/multipurpose room are up and workers begin installing the roof.

Opening Doors of Eternal Hope

Vale Church, thank you for your heart to bring the hope of Christ to Peruvian families living in extreme poverty. Because of your generosity, one person has professed faith in Christ! Pastor Wiliam and his wife, Nilda, express their deepest gratitude and great joy as they witness God building his church in this small town. "This new church is a long-awaited answer to our prayers. We are confident the Lord will open many doors to preach the gospel and share God's Word with the families in this community," says Pastor Wiliam.

Ministry Progress

As the physical structure is built, the church members are active in the community through house-to-house evangelism and outdoor worship services. When people are sick or in need of spiritual guidance, they come seeking prayer and direction from the pastors. While ministering throughout the town, church leaders are also identifying potential participants for the church's new child development center.

Construction Update and Next Steps

Heavy rains have prevented the delivery of materials and slowed construction progress. Despite these challenges, God has strengthened the team and they continue to make steady progress. Over the next two months, the church plans to work on the following:

- Plaster the front columns and beams.
- Place the metal roof.
- Pour concrete floors and sidewalks.

God at Work in Peru

Iglesia Evangelica de los Peregrinos

Marona, Peru

Serving 5 adults and 10 children

Your Gift in Action

A bulldozer begins to clear the land, preparing it for construction.

The construction team manufactures and places the metal frames for the support columns.

A brick mason assembles the exterior classrooms' walls.

Workers add grout to the brickwork for the classrooms.

The team has worked double-time to make up for hours lost due to heavy rains.

Two men work on the front-entrance facade.

The church holds an evangelistic outreach event in the community, which is eager to learn about God.

Equipping God's People

Vale Church friends, thank you for supporting children and their families in Marona, Peru. Because of your gracious support to plant Iglesia Evangelica de los Peregrinos, lives are being changed for the better. Your gift is a blessing to children living in poverty, empowering the local church to follow God's calling.
